

Make a Difference

And Have Fun Doing It!

What is Angels for Angels Charity Ball?

Angels for Angels is an upbeat, formal event designed to increase awareness and raise funds for a cure for Angelman Syndrome, a rare genetic disorder affecting nearly half a million people.

Who are you Supporting?

100% of proceeds will go to FAST (Foundation for Angelman Syndrome Therapeutics), and will be used to fund research focused on finding a cure for Angelman Syndrome. FAST is the largest, non-governmental funder of Angelman-specific research in the world. FAST raises money to fuel cutting-edge research and takes an active role in drug development to treat, and ultimately cure, the disorder.

Why Now?

Angelman Syndrome has been cured in the laboratory, using multiple strategies - drug activation of the paternal gene, protein replacement therapy, gene therapy and biologics. Cognitive and motor delays have been reversed in adult Angelman mice, suggesting that human therapeutics can achieve results at any age.

In short, bringing a cure to market is not a matter of “if”, but rather a matter of “when”.

.....

Your support of Angels for Angels and FAST can **accelerate the speed at which a cure is made available** to those living with Angelman Syndrome.

FAST

FAST (Foundation for Angelman Syndrome Therapeutics) is the largest, non-governmental funder of Angelman-specific research in the world.

Founded in 2008, FAST raises money to fuel cutting-edge research and takes an active role in drug development to treat, and ultimately cure, the disorder. FAST is a registered nonprofit, tax-exempt charitable organization under Section 501(c)(3) of the Internal Revenue Code. Donations are tax deductible as allowed by law.

FAST's Employer Identification Number (EIN) is 26-3160079.

What is Angelman Syndrome?

Angelman Syndrome (AS) is a severe neurological disorder that primarily affects the nervous system. Approximately one in 15,000 people have AS. Characteristic features of this condition include profound delayed development, intellectual disability, and problems with motor coordination and balance. Individuals with AS do not develop functional speech and most affected also have recurring seizures.

Disrupted sleep cycles also can be a serious challenge to the individual and caretaker(s). Individuals with AS have a normal life expectancy. They require continuous care and are unable to live independently.
