

On behalf of the Foundation for Angelman Syndrome Therapeutics, we would like to offer you the opportunity to be a sponsor for the annual FAST Translational Research Symposium and ABOM Scientific Meeting (“Symposium”), which will be held live on Thursday, December 1, 2022, prior to the family conference and gala that is on December 2-3. This event is planned to be in-person at the Diplomat Beach Resort in Hollywood, Florida.

Participants will be able to listen and participate in the most up-to-date research, from proof-of-concept in vitro and in vivo work to clinical trial updates, advances in clinical endpoints and biomarkers. This Symposium is designed for scientists, academic and industry partners, as well as regulatory and medical professionals. We have interdisciplinary participation of investigators whose research could inform or impact various therapeutic platforms in Angelman syndrome, as well as those in early and later stages of drug development. This Symposium is designed to foster collaboration and scientific/clinical advancements, and be confidential and supportive. The goal of this Symposium is to discuss progress and challenges towards potential therapies in AS, inspire thoughtful discussions on critical issues, and foster networking in a professional environment.

Your sponsorship is critical in assisting us with holding the most robust Symposium that will allow collaboration and scientific/clinical advancements! Please review the various sponsorship opportunities that follow. We thank you in advance for considering sponsoring this year’s Symposium!
